SUSTAINABILITY AT THE FOREFRONT

At Archidply, our commitment to the well-being of the environment begins from the ground up. Whether it is our sustainable wood extraction practices or our eco-friendly processes, we strive to be ethical and sensitive towards our surroundings.

To this end, all our timber and wood comes from high-yield plantations and aged trees that shed naturally and not from forest reserves or government parks. Additionally, our raw material sources are certified by:

OUR INFRASTRUCTURE

Karnataka CHINTAMANI UNIT

The facility in Karnataka – inaugurated in 2008 – is fully equipped to manufacture a wide range of panel products, including decorative veneers and pre-laminated boards. This flagship facility of Archidply Decor products is spread across 12.5 acres and is located just an hour's drive away from the Kempegowda International Airport. It has the capacity to manufacture 1.5 lakh sq m of decorative veneers and 54 lakh sq m of pre-laminated particle boards and MDF.

Myanmar

WARTAYAR VENEER INDUSTRIES PVT LTD

The Archidply Group, in its first ever overseas venture, founded a new company in Myanmar – Wartayar Veneer Industries Pvt Ltd. The facility has been strategically located and built to meet the growing demand for teak and Gurjan veneer back in India. Spread across four acres of land, the unit houses living and working quarters, production lines, corporate offices, and a canteen. This unit undertakes the manufacturing of commercial face veneer, core veneer, sawn timber, teak veneer, and plywood, among others.

OUR GURJAN PLYWOOD RANGE

BON VIVANT PREMIUM PLYWOOD

Gurjan Plywood is made from multiple sheets of peeled veneers that are stacked together and firmly bonded using resins. But what truly sets 100% Gurjan Plywood apart is its composition. While many plywoods use different materials for their core, front, and back, this plywood is made entirely with Gurjan hardwood. It is this feature that makes Gurjan Plywood more polished, refined, and expensive

compared to other varieties. The Bon Vivant Premium Plywood collection is characterized by a vast array of options that come with elegant finishes. It is a truly unique addition to Archidply's plywood collection and exudes strength, quality, and style.

OUR DECORATIVE VENEER COLLECTION

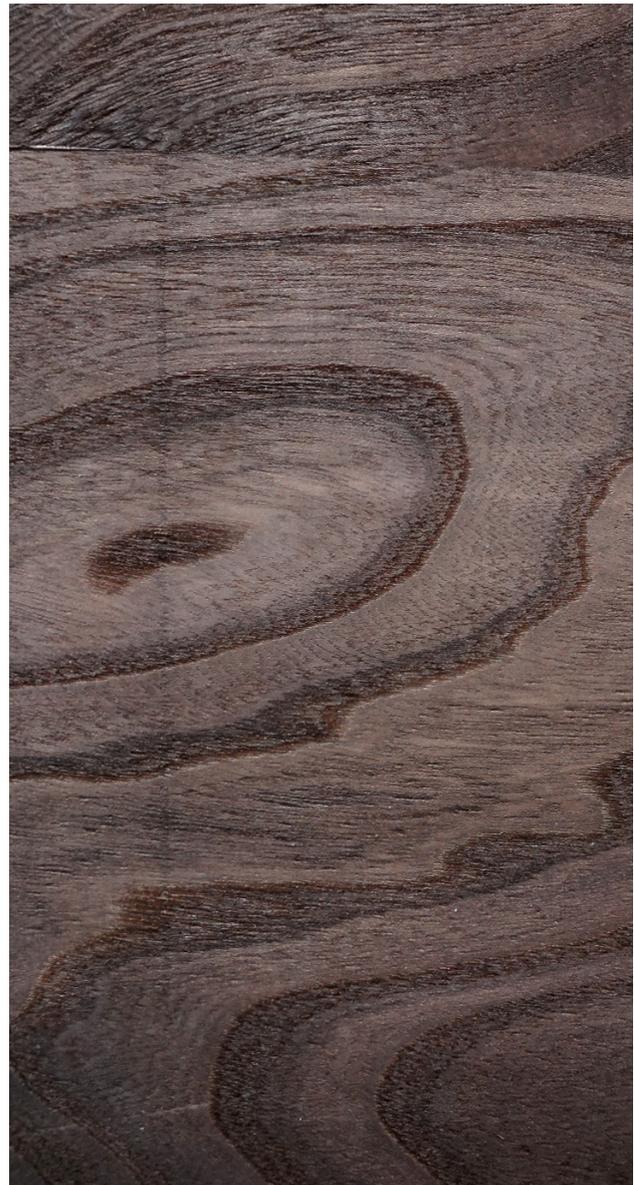

We, at Archidply, are proud to introduce our latest and most exquisite collection of decorative veneers. Each of these veneers uses wood sourced from the jungles of Bolivia, rainforests of Indonesia, and even the valleys of Chile. With each design as unique as their place of origin, this collection is every designer and architect's dream come true. Further, every one of our veneers are manufactured with a precise process that makes our products overlap free, thereby guaranteeing a superior and seamless finish!

BON VIVANT PREMIUM DECORATIVE VENEER COLLECTION

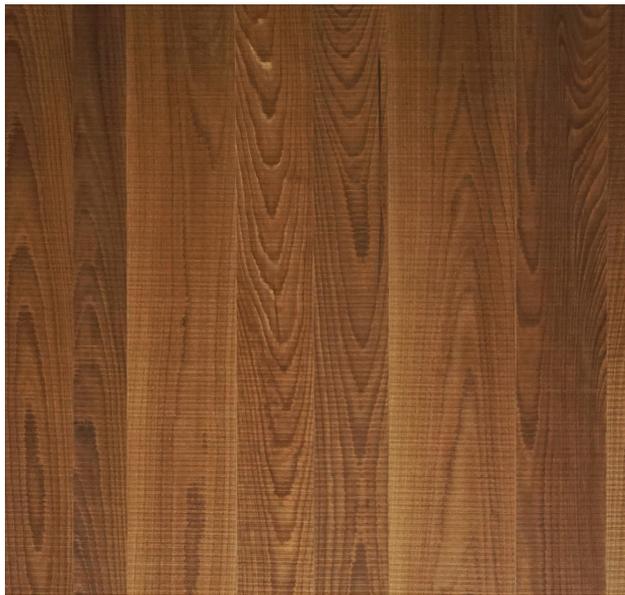

Wonder Grain

Our collection of open-grain veneers go through a special manufacturing process that helps highlight the texture and grain, making it resemble sawn lumber. These veneers are versatile and can be stained to the color of your choice to give your space an authentic, natural finish.

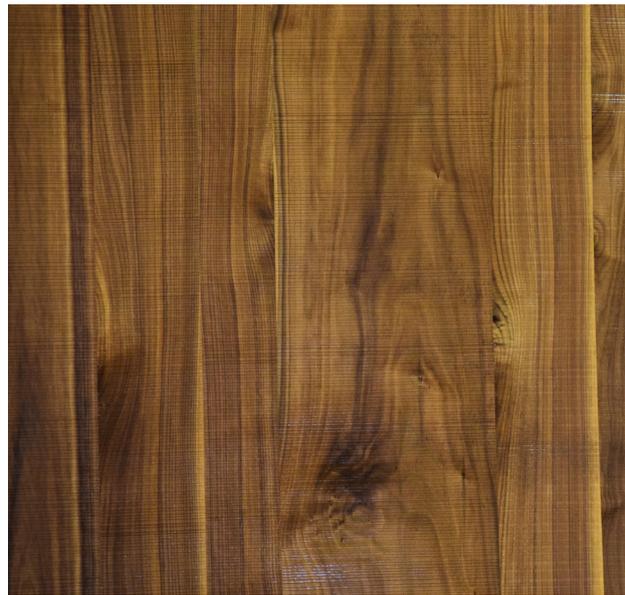

Metallic

This range of veneers is manufactured by fusing wood with metallic colors such as copper, bronze, and silver. It gives every piece of wood a stylish sheen and sleek finish, ensuring it stands out in any space.

10x4

10x4 is a unique product range that is specially created with best-in-class wood and ensures minimum wastage. On application, it gives the product a grainy, roof-style finish.

Textured

This collection is specially crafted by slicing the veneer with a serrated knife, thereby leaving the surface with a jagged finish. This then gives the veneer a textured, sawn-like surface that looks as unique as it sounds.

Vintage

Transport yourself to the olden days with our vintage collection, processed with natural cracks and derived from preserved, 200-year-old timber. This quality helps retain the wood's natural texture and color, giving it a unique look.

Rare Exotic

Africa, Southeast Asia, Europe, or America, this collection has got it all. This range is entirely inspired by the diversity that the world has to offer, with chic and natural veneers that are handcrafted to perfection.

Life Tree

This exquisite variety is made from timber in its purest form and is best suited for doors and counters. It is sliced vertically without clipping the edges in order to retain its natural form and features.

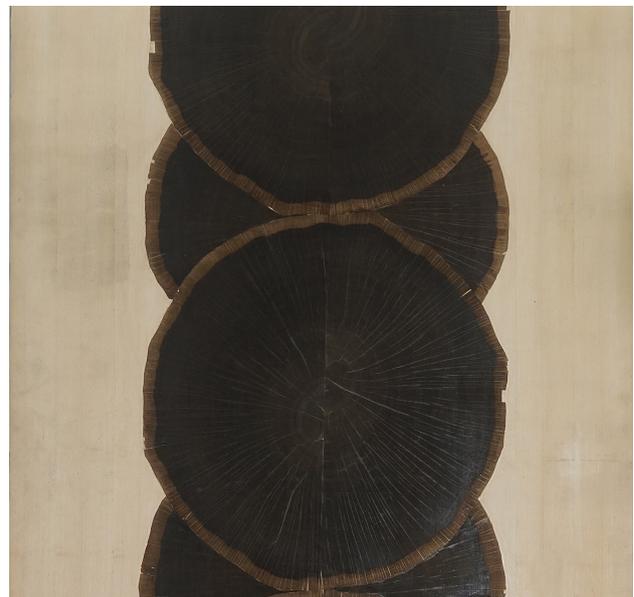

Burls and Crotches

This collection is a truly rare breed of wood veneers, designed to represent a tree's burl and crotch patterns. While burls create a chaotic grain pattern with a wart-like structure, crotches manifest where the tree splits into two limbs.

Designer

With this range of handcrafted veneers, you can personalize your design to craft a completely unique and exclusive space. Further, these veneers allow you to play with various geometric patterns and designs that provide an exquisite finish to every piece.

Rotary Cut

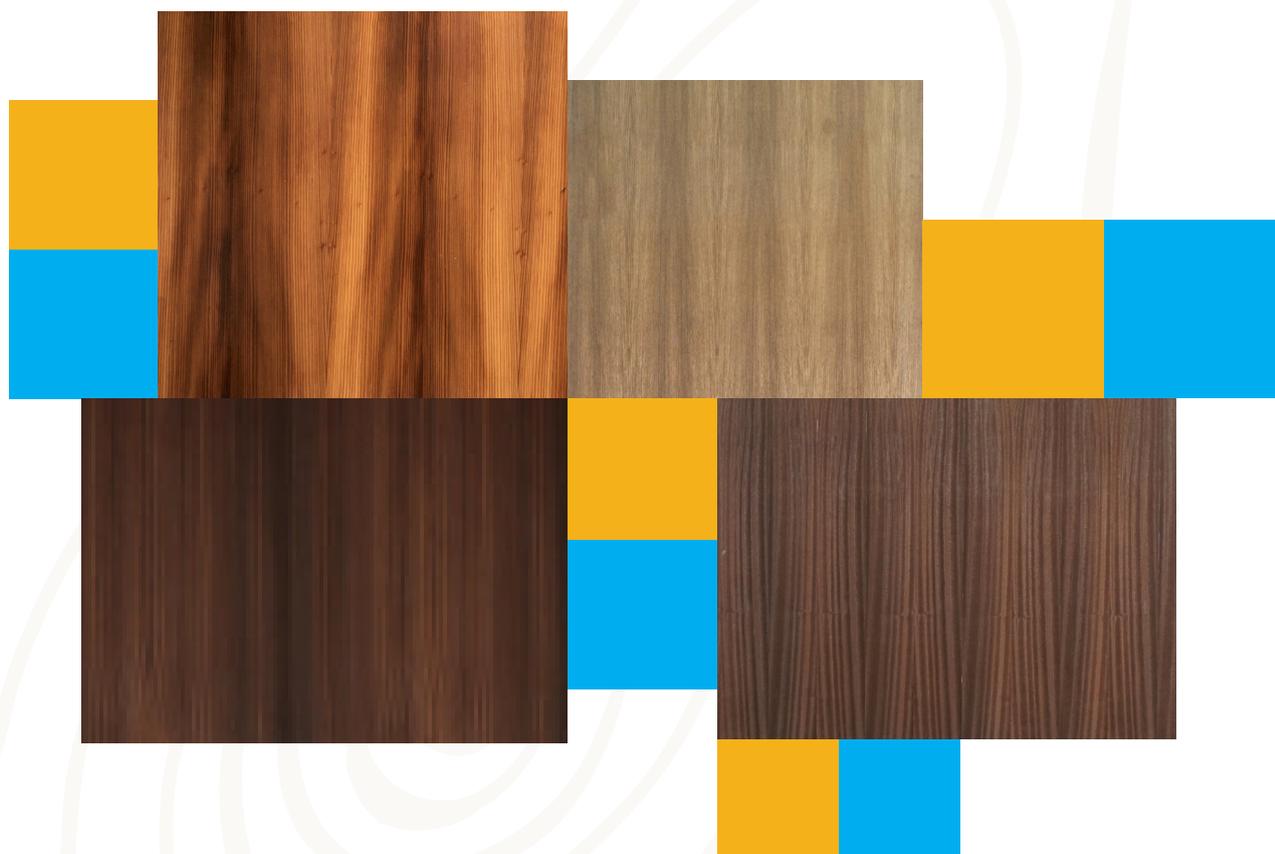

This fine collection of veneers offers the classic look of concentric growth patterns in an exotic new avatar. It is a unique type of decorative veneer – also known as butt-cut veneer – that is extracted from spare round logs, making these veneers eco-friendly yet stylish!

ARCHIDPLY NATURAL DECORATIVE VENEERS

FUMED AND FSC COLLECTION

Our fumed veneers – in FSC and plain – come in a wide color palette, ranging from honey to darker brown tones. Our advanced techniques bring out a warm and dark texture and give the end product unmatched consistency of color and grain.

NATURAL COLLECTION

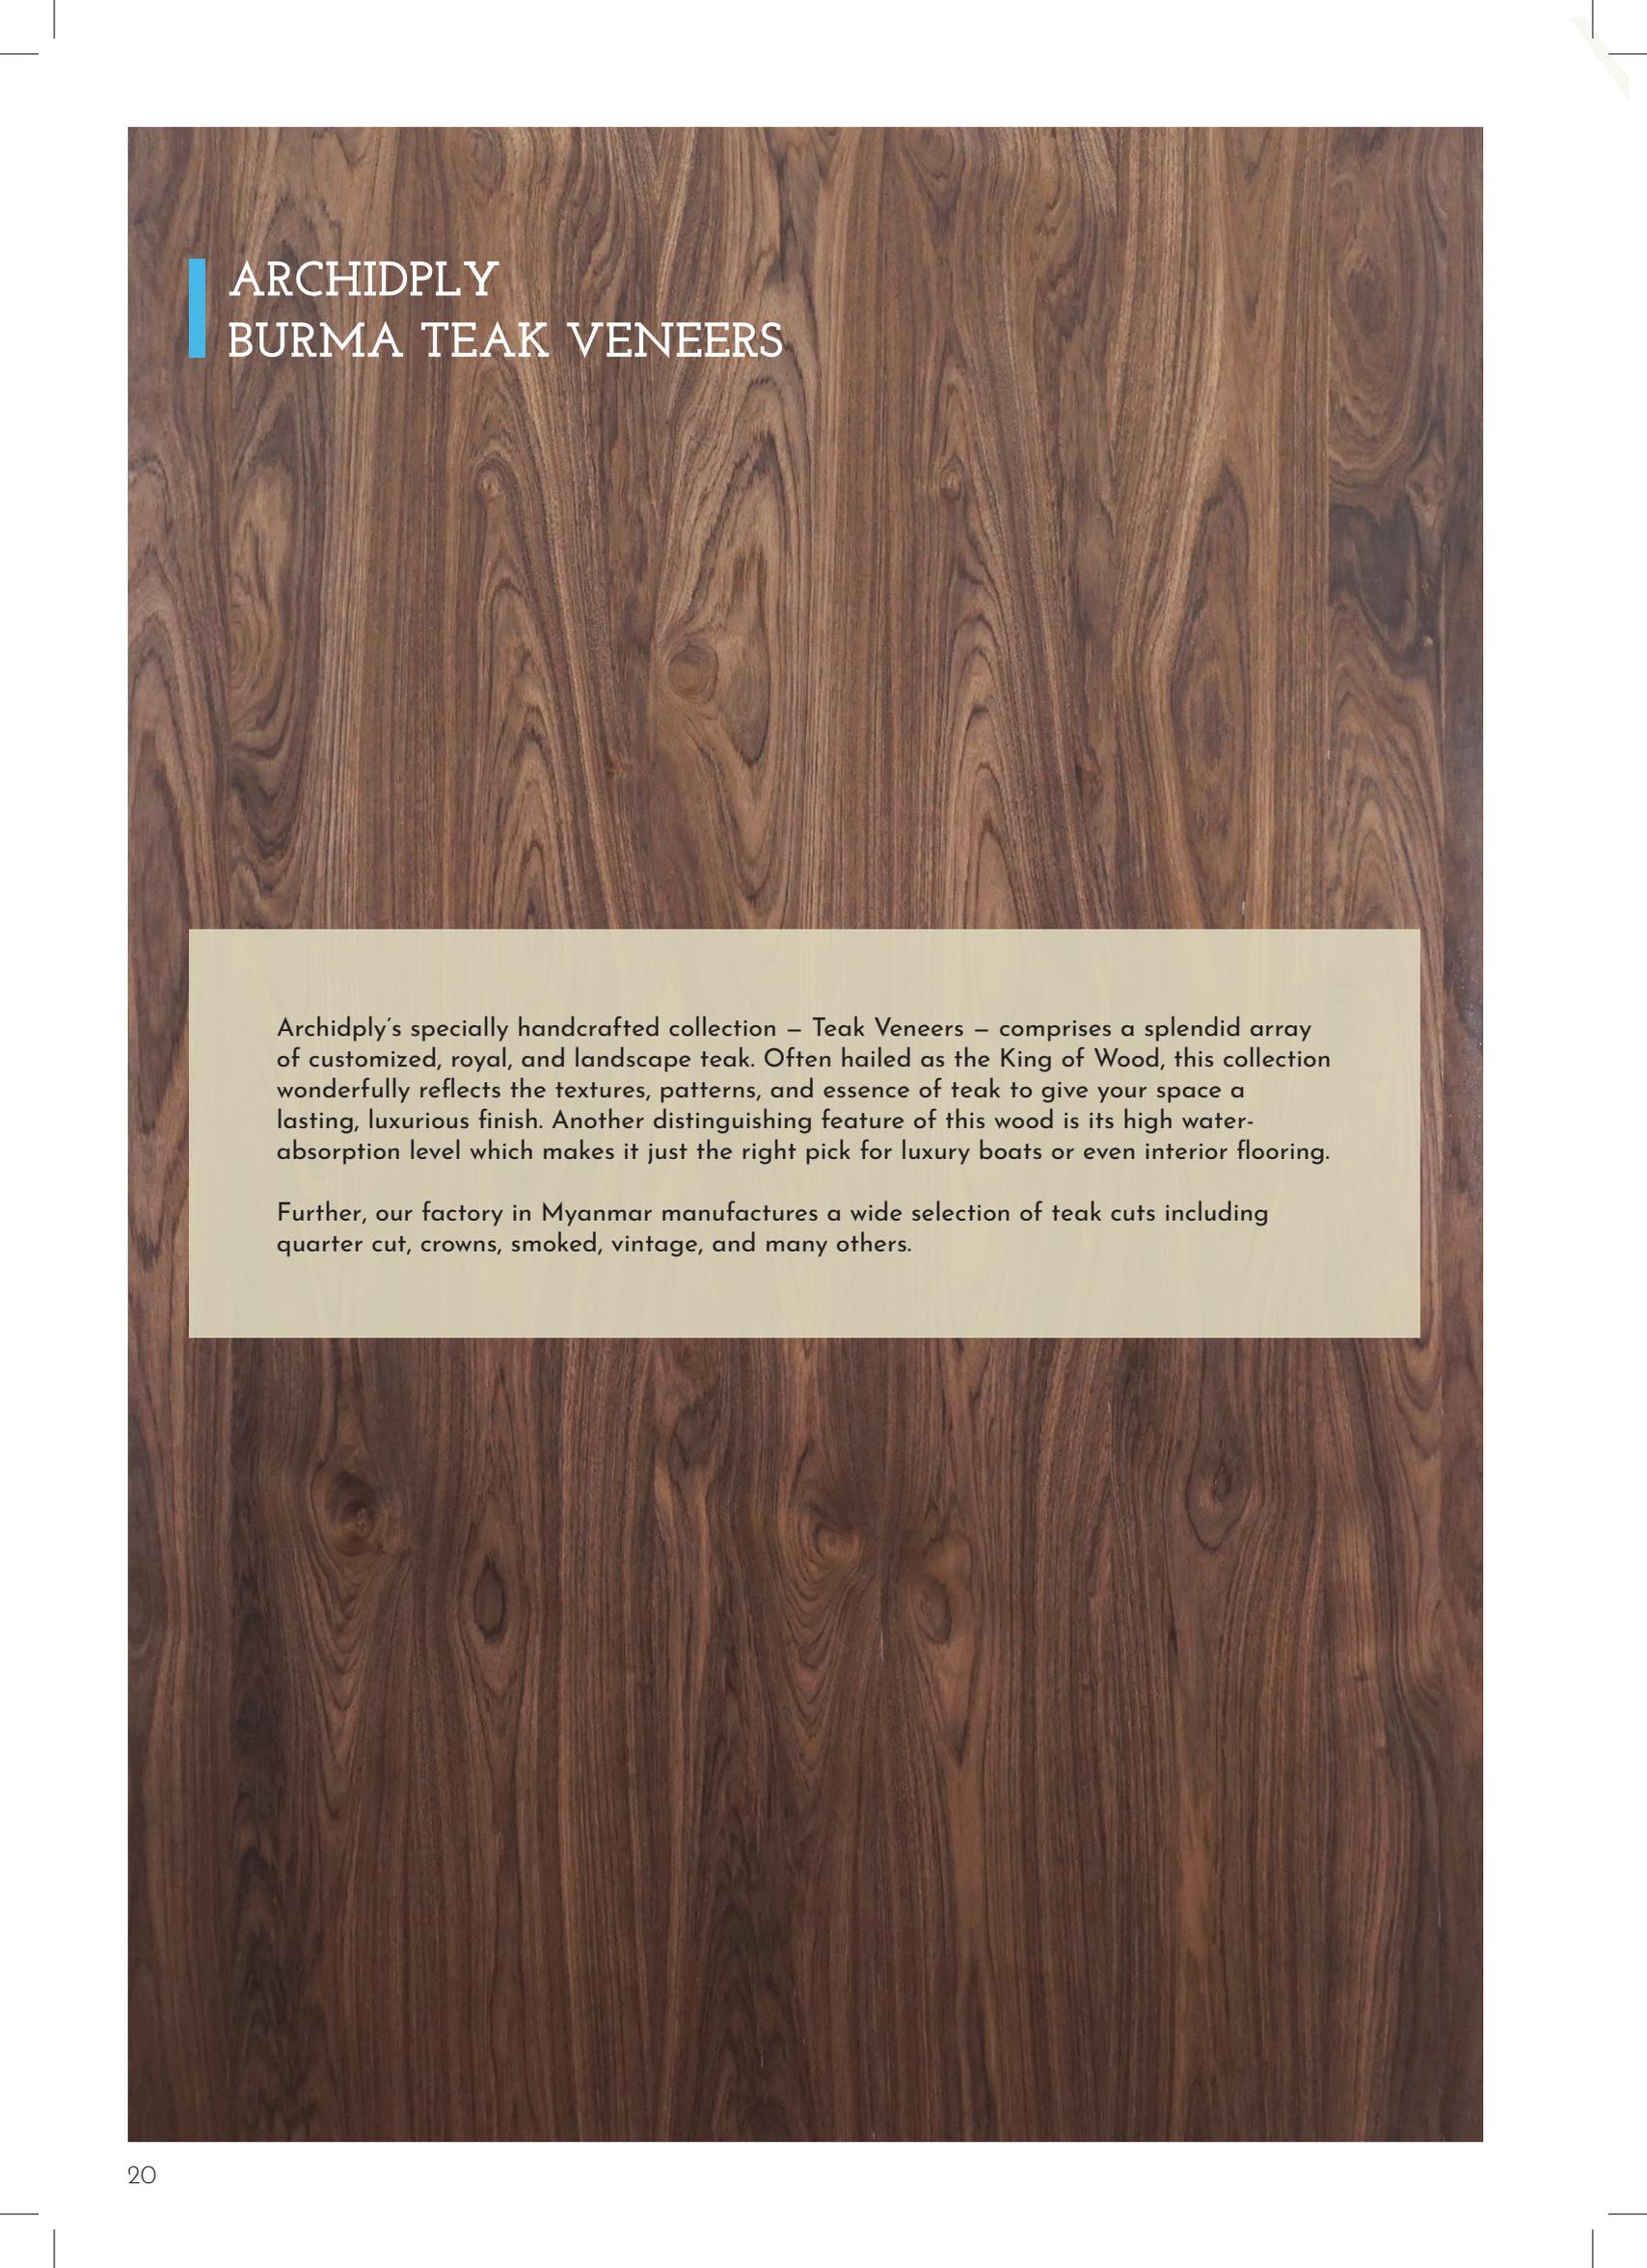

This range of veneers is designed to enhance the natural lighting within your home, thereby helping you breathe easy. This collection also uses an extra-thick layer of decorative veneer to make it durable and less susceptible to wear and tear. Additionally, they are 100% powder-proof!

DYED COLLECTION

Give your home a touch of color with our wide range of dyed veneers. With an exhaustive range of colors to choose from, you can now decorate your furniture to match your taste. Archidply brings to you the world's most striking color palette with the assurance of quality.

ARCHIDPLY BURMA TEAK VENEERS

Archidply's specially handcrafted collection – Teak Veneers – comprises a splendid array of customized, royal, and landscape teak. Often hailed as the King of Wood, this collection wonderfully reflects the textures, patterns, and essence of teak to give your space a lasting, luxurious finish. Another distinguishing feature of this wood is its high water-absorption level which makes it just the right pick for luxury boats or even interior flooring.

Further, our factory in Myanmar manufactures a wide selection of teak cuts including quarter cut, crowns, smoked, vintage, and many others.

Royale Teak

These veneers are made from pure Burma Teak and are arranged in crown and quarter-cut patterns to give each piece an exquisite look. Further, they can be placed in either horizontal or vertical patterns, and promise a rich color and grain. These features make this range ideal for furniture and paneling alike.

Grades:

Royale Carbonized Teak

This variation of our teak veneers is gently smoked to give it a chocolatey brown color and rich honey tone. It is available in both flat-cut and quarter-cut veneers, and is perfect for paneling and furniture.

Grades:

Teak Quarters

This premium collection of veneers is made from the finest Burma Teak, a range known for its rich legacy and versatile color palette. Its lovely natural color and straight-line patterns can be finished with polish to retain the product's timeless quality.

Grade:

Royale Vintage Teak

This range of teak is effortlessly stylish, vintage, and sleek. It enhances the natural characteristics of the wood, such as knots and cracks, to give your home a naturally rustic look.

ARCHIDPLY ENGINEERED VENEERS

Recomposed, reengineered, and reconstituted – this Archidply range takes existing veneers and designs them afresh, giving them a brand new look and style. These engineered veneers are known to be extremely versatile and are available in a range of sizes and thicknesses – making them the right choice for shop fittings and hotel interiors. Further, we offer this range in various types, styles, and patterns that can be customized to your preferences.

ART E O SPACE DESIGNER

Archidply's engineered recon veneers are manufactured from sustainable sources. This ensures retention of the wood's natural qualities while maximizing its usage, giving each product a stunning, uniform, and natural finish.

ART E O SPACE ELITE

This range of engineered veneers is known for its consistency in grain, pattern, and color – in addition to being versatile in texture and appearance. Space Elite makes for the perfect pick when it comes to ensuring color and consistency in any given space.

ART E O SPACE CLASSIC

Environment friendly, renewable, and classy, this range of engineered veneers is truly in a league of its own. Space Classic is made to resemble nature at its best, with distinct textures and colors that would otherwise only be found in the wild! Also, they make for a great alternative to several other over-priced and exotic wood species in the market.

ARCHIDPLY'S PRE-LAMINATED BOARDS RANGE

PRE-LAMINATED PARTICLE BOARD

The Archidply pre-laminated boards range, boasts versatile decor options. Each one of our boards is melamine-impregnated and then machine-pressed under controlled temperature and pressure. These

boards are suitable for use in partitions, paneling, false ceilings, cupboard shutters, furniture, and panel door inserts.

100% wood particle boards

Manufactured by German short-cycle technology

Eco-friendly

Imported melamine and decor paper

STANDARD SIZES: (IN FT)	THICKNESS: (IN MM)	GRADE:
